PROFILE

First-year Robotics and Intelligent Systems student at Constructor University with a passion for building interactive software and systems. Outside of coursework, I have been actively pursuing game development as a personal interest, designing and implementing complex software systems from scratch. Comfortable working in teams or independently and picking up new tools quickly.

EDUCATION

B.Sc. Robotics and Intelligent Systems — 2025 – Present
Constructor University · Bremen, Germany
Expected graduation: 2028
GPA: 1.50 (German Scale)

PROJECTS & EXPERIENCE

Project Fatal Tarot · *C# · Unity* | itch.io link — 2026

- Collaborated as part of a team to design and implement a turn-based card combat system where players select from a 3-card hand and resolve rounds based on card value comparisons
- Implemented best-of-three combat logic, handling hand management, state transitions, and damage calculation
- Built UI for card selection and round feedback, ensuring clear player interaction and smooth gameplay flow
- Awarded 3rd place at Constructor University Bremen "Press Play" Game Jam (2026)

Volunteer, Turkish Cooperation and Coordination Agency (TIKA) · *Romania* — 2024

- Participated in the logistical organization of aid (receiving, sorting, and preparing for distribution)
- Directly contributed to the distribution of food products and essential goods to affected individuals
- Supported field teams in identifying beneficiaries' needs
- Collaborated with fellow volunteers and coordinators to ensure efficient execution of activities
- Adhered to safety standards and established procedures throughout all operations

Volunteer Teacher Assistant · *NR.1 School of Izvoarele · Romania* — 2023 – 2025

- Attended select lectures to assist the teacher with classroom management and attendance
- Reviewed homework and portions of tests, providing written feedback to help students understand their mistakes
